Skills

JavaScript, React, Node.js, Redux, HTML5, CSS3, JQuery, Oracle SQL, UI/UX design, Wireframing, Git(flow), GitHub, Visual Studio, Microsoft Office, Chrome DevTool, Adobe Suite

Projects

Moviely - utilizes a movie database api to show upcoming movies, featured movies, and the highest rated movies of all time. *Moviely* also allows users to search for movies and see individual movie details.

Power - makes use of React, Redux and its own API to allow users to track and compare their fitness goals.

Star Wars - was built from react components and uses a *Star Wars* API which allows users to search for specific items in the *Star Wars* universe.

Weatherly - was made using React and Redux. I utilized several APIs to fetch weather data asynchronously based on a searched location in the United States.

Chat App (Andrew Mead's Node.js course) - focuses on using Socket.io to allow users to send messages in specific user created rooms. Built using JavaScript, Node.js, HTML5, and CSS3.

Education

Oklahoma City Community College -- Oklahoma City, OK (2015-2017):

- 48 credits completed focusing on basics
