Skills

JavaScript, Node.js, React, Redux, HTML5, CSS3, Jquery, UI/UX design, Wireframing, Git(flow), GitHub, Visual Studio, Microsoft Office, Chrome DevTool, Adobe Suite

Projects

Moviely - *Moviely* utilizes a movie database api to show upcoming movies, featured movies, and the highest rated movies of all time. *Moviely* also allows users to search for movies and see individual movie details.

Weatherly - Was made using React and Redux. I utilized several APIs to fetch weather data asynchronously based on a searched location in the United States.

Balloon Quest - *Balloon Quest* is a gaming mobile app developed for Android. Using C# and Unity. I coded the gameplay, created all of the animations and images through Photoshop, and made the soundtrack.

Chat App - (Andrew Mead's Node.js course) - *Chat App* focuses on using Socket.io to allow users to send messages in specific user created rooms. Built using JavaScript, Node.js, HTML5, and CSS3.

Education
